OVER THE YEARS

Commentaries based on cataloging over 300 sales since 1928

In recent months the once "occasional demand" for "decent circulated coins and currency" has blossomed into a strong interest, resulting in a steady advance with some popular pieces increasing nearly 100% in value since January. Yes, the collector is still there, and these coins should produce dividends financially as well as personal enjoyment.

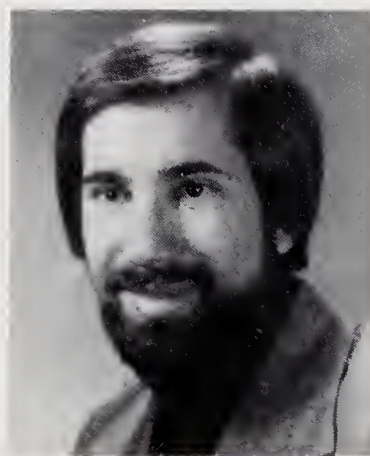

A standardization of terms used in grading would be helpful. In discussing this with other auctioneers and professional numismatists, as well as checking price lists and ads, we note the most confusion is in grades above BU(MS)-60 to 70. Seldom indeed should the "magic" BU-70 (perfection grade) be used. Most seem to prefer BU(MS)-66,-67,-68,-69 for "Super Coins" or "Wonder Coins." We use "SUPERB" or "SUPERB GEM BU-67,-68 and rarely -69." The "BU-66" grade seems to be a bit difficult to "pin down," therefore we usually avoid its use. However, there seems to be enough difference "grading wise" and "money wise" between "BU-67" and "BU-68." The "BU-69" grade should, of course, be as close to perfection as possible. Perhaps "BU-70" or "PROOF-70" should be reserved for modern coins struck specifically for collectors and packaged so that they are fully protected in their original carefully manufactured state.

The main difficulty lies in "BU-60" to "BU-65" grades. The ANA uses "Choice" for "BU-65" without any word for conditions from "BU-60" to "BU-65." Most professionals use "GEM BU-65" and "Choice BU-63" to cover these two grades. Some use "BU-61" or "BU-62" for the low end of Choice but we have resisted doing this. We have been using "Very Choice BU-64" for those just below "GEM BU-65" and somewhat superior to the usual "Choice BU-63." Judging from the comments received, it seems to "fill the bill" in this area. Hopefully, the words "Choice" and "Gem" will come to be more specific in their meaning. If the words are used in conjunction with the grading numbers, then it does not matter too greatly, but when we see them without specific grades, then it could be misleading. Check *Coin World* and *Numismatic News* ads and you will realize how difficult it must be for collectors to judge the exact condition of some of the material being offered.

HOW TO BID

What to Bid On:

As you read through the catalog for the first time, record the numbers of all the lots you are interested in on a worksheet. If you are interested in specific types of coins, be sure to check the catalog index.

How Much to Bid:

The price you bid is determined by you. You must remember the value that you place on the coins. Check the values listed in the catalog and decide what you are willing to pay. You should bid generously on the lots you strongly wish to obtain. If there are some lots you would like to have 'if the price is right', then you may want to place nominal bids on those lots. Because a number of collectors choose to bid on many lots, the number of successful bids will be relatively small. This is controlled by a very active market. **You can safely extend your bidding** (and take advantage of a 'bargain') by placing a dollar total limit on your bids. Should your total be reached before all your bids are executed, we will then terminate your bidding.

Remember that your bids are limits. It is possible, and quite often does occur, that you will succeed in purchasing a lot for less than your bid since we start the floor bidding at about 5-10% above the second highest mail bid. Example: You bid \$500.00 on the lot and the next highest mail bid is \$400.00, we start the lot bid at \$425.00. If there are no bids from the floor, you will then be awarded the lot at \$425.00 - or if the floor bidding stops at perhaps \$450.00 or \$475.00 then you will receive the lot at a small advance above the top floor bid. If bidding continues above the \$500.00, then that floor bidder will be awarded the lot.

How to Fill Out the Bid Sheet:

On the Bid Sheet you will observe that there are two different column headings. Lots and Bids. When you decide on the lots you want to bid on, enter the lot numbers under the proper column and the maximum amounts you are willing to pay for those lots in the proper column.

LOT	BID	LOT	BID
482	550.00		
517	900.00		
614	130.00		

If you have circled one of the increase percentages, you will be allowing us to increase your maximum bid in order to obtain the lot which is going for more than you had anticipated. We will buy the lots for you as low as possible as outlined in the **TERMS OF THE SALE**.

GRADING STANDARDS

We use Dr. Sheldon's numerical grading system for the grading of U.S. Coins. This is the system that has been used with great success by sophisticated numismatists for many years and now adopted by the A.N.A. We use the following abbreviations and descriptions:

POOR-1	Barely recognizable as to type.
FAIR-2	Showing minor detail.
ABOUT GOOD-3 (AG-3)	Rims worn down into lettering but interior detail visible.
GOOD-4,6	All interior outlines visible.
VERY GOOD-8,10 (VG-8,10)	About 25% of the interior detail will be visible, date barely readable.
FINE-12,15	30% to 50% of the interior detail will show.
VERY FINE-20 through 35 (VF-20,25,30,35)	60% to 85% of the interior detail will show. 35 (Borderline EF).
EXTREMELY FINE-40,45 (EF-40,45)	90% of all interior details will show.
ALMOST UNCIRCULATED 50, 55 (AU-50, 55)	Bare traces of friction at the highest points. 55 +(Borderline Unc).
UNC-60 (MS-60)	Strictly Uncirculated with no rub or friction, i.e. NO WEAR.
CHOICE BU-63 (MS-63)	A Choice Uncirculated specimen nicely struck and with nice luster.
GEM BU-65 (MS-65)	A Gem coin in all respects. Fully struck. Only a bare minimum of minor abrasions (marks).
SUPERB GEM BU-67 (MS-67)	If you look real hard with strong magnification you might find a faint flaw.
PERFECT GEM-70 (MS-70)	Once in a great while, a perfect coin is sold.
PROOFS & SPECIMENS	Proof and Specimen are methods of manufacture, not grades. All of our Proofs, Specimens, and Proof-Likes are graded in the same manner as our business strikes (examples: Proof-55, Proof-60, CHOICE Proof-63, GEM Proof-65, SUPERB GEM Proof 67).

CURRENCY

GOOD	Well worn but all devices legible.
VERY GOOD	Fairly well circulated but quite legible.
FINE	Some circulation but with decent color and some crispness.
VERY FINE (VF)	A few folds with much of original crispness.
EXTREMELY FINE (EF) or(XF)	Two or three light folds, light soiling or handling marks.
ALMOST UNCIRCULATED (AU)	A single fold or several tiny corner folds.
CRISP UNCIRCULATED (CU)	No fold or corner creases! Corner may be rounded or note not completely centered but no creases (i.e. broken fibers) can be evident.
CHOICE CU	A brighter or fresher note with full borders although one or two may be slightly off-center.
GEM CU	Brightness and well centered, sharp corners.
SUPERB GEM CU	Perfect centering and bright colors. As nice as the day it was printed.

Artificially processed notes will be so described.

REGARDING ANA CERTIFICATION

KAGIN'S ARE PROVIDING COMPLETE AMERICAN NUMISMATIC ASSOCIATION CERTIFICATION OF YOUR RARE AND UNUSUAL COINS. We at Kagin's think that this certification service is essential in assuring the authenticity of the coins you purchase. This certification service guarantees you the genuineness of the material handled in a Kagin's Auction. **FOR ALL OF THE COINS FEATURED WITH PHOTOGRAPHIC REPRODUCTIONS ABOVE THEIR RESPECTIVE LOT DESCRIPTIONS WE WILL FURNISH ON REQUEST AN ANACS CERTIFICATE.** We are pleased to provide this service for our consignors at no extra charge.

The American Numismatic Association Certification Service, ANACS, is a branch of the federally chartered, non-profit, educational American Numismatic Association. The professional staff at ANACS examines and when necessary, will conduct non-destructive tests on numismatic material submitted for certification. The results of these tests are then furnished to the person submitting the item along with a statement of ANACS opinion concerning the authenticity of the coin.

All coins that are determined to be genuine, are then issued a certificate of registration. This certificate records an identifying code number, a statement of authenticity and documented photographs.

Kagin's is the only auction company that offers this ANACS for all the major coins featured in our auctions. This is a valuable benefit that Kagin's is able to offer you. It protects the collector and the consignor. You will be able to take advantage of this essential service when you consign your coins to a Kagin's auction.

CURRENCY MARKET REVIEW™

Vol. 1 No. 1 April 1, 1980 Single Issue Price \$1.00

Large Six United States Currency notes in the latest new areas of profit potential and has been overlooked for too many years. Consider the following:

If compared to coins of the same series, currency is priced at about 1/10th as much. While one or two notes may have changed hands at \$2.00, one United States note has sold in auction for more than \$1,000.00! Compare this with an average coin of over \$200.00 in the same series.

2) U.S. currency has not been given prominence, rather as an investment in its speculative purposes.

3) While notes in top condition can now be obtained, they are actually SO MUCH less than a year or two ago. The market will simply not be available at any reasonable price, as the case for coins in the late 1960's.

4) Due to the higher face values for notes versus coins, FAREWELL will hold only circulation.

5) Currency is extremely abundant, and as such is a very popular discount for both the collector and investor.

6) There are now several good reference works available. Prior to 1960's, no one was printing paper money in 1960's, few people collected notes. With the advent of the reasonably priced Danton book in 1968, paper money collecting became popular.

for a growing fraternity of collectors. Now, the increasing attention and sale of the latest growing numismatic fields has brought about the publication of a monthly newspaper, a magazine, and a separate series of over 1,000 page paper money collectors.

BEST CURRENCY INVESTMENT UNDER \$1000

The following is a small selection of notes which in my judgment could easily double in value by 1980. Several could even triple by then. Use as currency market value for NEW money. Basic Danton and Frothing numbers are given for quick reference. Risk Factor indicates the discount from market value during a sale.

ERRORS, STARS, LOW SERIAL NUMBERS ETC.

There are new and specialized fields of currency collection and many notes are now being acquired by collectors. These are usually sold in the complete reference books available. Especially the most interesting the coin the higher it is priced.

“Bid” and “Ask” prices, currently paid by dealers, are listed in grades of **Very Fine, Extremely Fine, Crisp Uncirculated** and **Gem Crisp Uncirculated**. The notes are listed by **Class** (Silver Certificates, Gold Certificates, etc.); **Series** (1882, 1899, etc.); **Denomination**; and **Seal Variety** (Red, Brown, etc.); and a special selection of **U.S. Fractional Currency**. In addition to prices, there will be a column discussing the currency market in general.

Lot 704 — 1379

FLOWING HAIR SILVER DOLLARS, TYPE I, 1795

704. 1795 **TYPE I, FLOWING HAIR**, variety with 2 leaves under each wing (B-1), **Nice About Uncirculated** with some friction, well struck with Deep Edge Dentilations, Sharp Stars. Even grayish golden luster, right wing shoulder not quite as sharp as left shoulder (characteristic of those seen over the past 50 years or so). A highly desirable specimen of the first type of silver dollars. Setting new records.

705. 1795 **Flowing Hair**, variety with 3 leaves under wing, **Borderline EF-35**, obverse fully EF except for center hair strands not being as sharp as balance; reverse a Sharp EF except for eagle's breast and portion of right wing. Some pinpoint marks on rim and center rev. An attractive specimen of this popular short-lived type. Setting new records.

DRAPED BUST, SMALL EAGLE DOLLARS, TYPE II, 1796-1798

706. 1796 SMALL EAGLE, Sm. Date & Lg. Let., VF-30, Clear surfaces with attractive greyish toning and hints of luster. Hair strands below ear not fully struck up but balance good strike. Defect at lower reverse edge, otherwise quite nice. Scarce.

707. 1797 B-3, 10X6 STARS, Virtually Uncirculated, only barest friction, Nice Strike with lovely original gray bluish golden luster. *THE LOWEST COINAGE YEAR From 1795 Through 1803! RARE SO CHOICE!* We noted a comparable specimen of the more readily available 1796 at the Lincoln CSNS convention in April at \$15,000; surely this rare date now worth somewhat more.

708. 1798 B-1, SMALL EAGLE, 13 Stars, Choice AU-55, *A VERY RARE and UNDERVALUED* small eagle type R-4. Excellent sharpness of bust detail and stars with some faint "mint equalization" marks noted (done at mint to bring planchet down to proper weight). Usual softly struck eagle on reverse but wreath is exceptionally bold and well defined. Lovely deep lavender on obverse with splashes of green and red. One of the sharpest specimens we have seen.

LARGE HERALDIC EAGLE DOLLARS, TYPE III, 1798-1801

709. 1798 LG. EAGLE, Close Date, High 8, Choice AU-55, A sharp *FULLY STRUCK* specimen with remarkably clear and well defined drapery, hairlines and edge lettering. Center portions of reverse around eagle's wings and shield are quite exceptional (many come with weak "dished dies" soft centers). Attractive grayish gold toning.

710. 1798 B-24a, Choice BU-63, die cracks at right leading to die failure at shoulder before hair strands and corresponding portion of reverse (upper right three stars not visible and fourth is faint), short mark at top right rev. Sharp Stars and Hair Strands. Lovely lustrous gray bluish golden luster. Undoubtedly "CONDITION-CENSUS"!

711. 1799 Sharp VF-30, Overall nice clear planchet with excellent sharpness of legends and devices. Some slight weakness noted in top center hair strands and lower tips of eagle's feathers. 1,000.

712. 1799 B-10, Large Berries, Choice EF-45/AU-50, A lovely specimen, considerable original luster and deep rich bluish golden toning. Obv. center hair strands of Bust are trifle weak; rev. detail strong and sharp and remarkably free of the usual "dished die" characteristics (center portions receiving considerably more wear). In strong demand.

713. 1800 B-16, Choice EF-45, Full Stars, attractive pale golden bluish toning (bought as "Choice AU"). *SCARCE*.

714. 1800 B-18b, "Comet" Variety (die breaks above right clouds) and *UNLISTED* late die state similar to B-18a but with pronounced reverse die break extending along outer edge above *AMERICA*. Choice About UNC-50, Pleasing deep grey toning, well struck with nice clear surface. Obverse stars at left and one at right are a trifle weak, the result of die failure when struck at Mint.

715. 1801 B-3, Wide Date, EF-45, Attractive pale golden bluish toning, excellent sharpness overall, strands of Bust showing some weakness. Nice clean surfaces, no significant marks worth mentioning with the exception of tiny edge nick lower rt. obv. edge. Scarcer date.
716. 1801 HERALDIC EAGLE, Very Fine-20. Trends 700.

LIBERTY SEATED DOLLARS, NO MOTTO, 1844-1860

“1846 OVER 44” PROOF DOLLAR EXCESSIVELY RARE & “FINEST KNOWN”?

719. 1846 OVER “44” (or Re-Engraved Date), **GEM BRILLIANT PROOF-65!** Gorgeous blue purple iridescent toning. Needle sharp Wire Edge. *EXCESSIVELY RARE!* Only 6 or 7 said to be known. *ONLY STRUCK IN PROOF.* Listed in 18th edition of the Standard Catalogue of U.S. Coins (Wayte Raymond) as “1846 over 44” (the only overdate of series). Other specialists now call it “reengraved date.” Regardless of which opinion is accepted, we do know it is an *outstanding rarity and the finest we have seen in our Fifty years in numismatics.* Perhaps an equal specimen may exist but not a *superior one!* This specimen (lot 1312 from our 11/73 Sale of the 70’s) realized \$27,000; surely now 8 years later, this remarkable rarity should induce spirited bidding and a new auction record.

“10”

Now, Kagin's offers collectors a “10”!

10% Commission*

The lowest rates in our history! We invite comparison.

Over the past two years, we have expanded our operations to include in-house typesetting, photography, and graphic arts production. This has greatly increased our efficiency in producing auction catalogs. This efficiency means savings to us, which we are passing on to our consignors.

To help cover the cost of presenting public auctions, we are also instituting a slight 5% buyers charge. After extensive analysis of European and non-numismatic U.S. auctions, we have noticed that a 5% buyers rate has little or no effect on bidding.

The result of these new rates will be MORE NET PROFIT to our consignors.

*10% commission on items over \$1,000 in value. 15% for items up to \$1,000.
